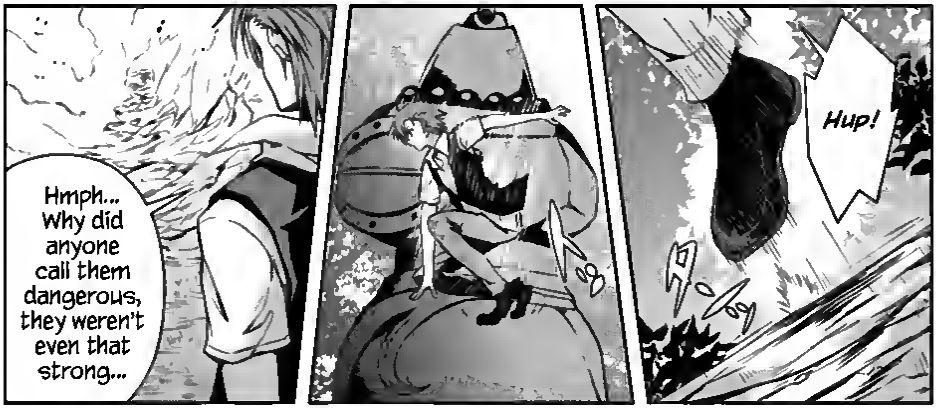
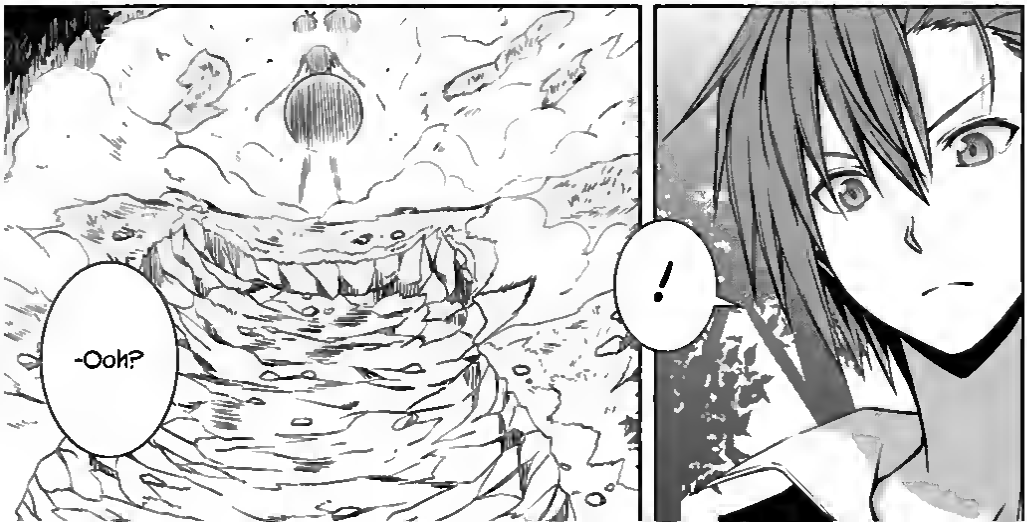
Section 4 - The Arahabaki Spacesuit (Part 2)



Hmph... Why did anyone call them dangerous, they weren't even that strong...
Hup!

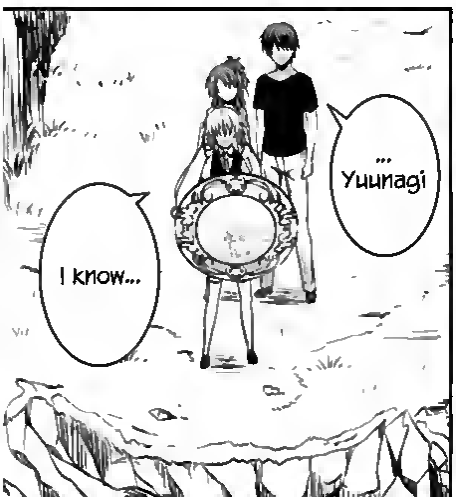


-Ooh?
!

Curator Class Five?
...Is there a legitimate reason for this fight,
A surprise attack, unauthorized engagement in combat... And even involving a civilian.
What justice are you talking about?
A shield... Is that the D-part Curator Class Nine uses?
To think you'd be able to withstand my blow of justice, you're pretty good.

The "Sinner" that the division chief fears... To eliminate him is my only priority...
Within this holy war of justice, small sacrifices or ambushes are necessary.
Hmph.-

A division chief... Not one of your allies, Kagimori...?
Knowing that this idiot is a higher class than me makes my head hurt ...
イラッ



I know...
... Yuunagi

I hope Yayako-senpai is safe... If that's the case
I see... It must be the doings of a Museum noble

Hyaaa!?
I won't let you run, "Sinner!"
I won't let you...
Assyria!

Hm...!?
Senpai, hurry!
I don't understand what power you're using, but you defended him again, Ninth!
But don't forget that there's another whip of light!
...Please stay still, Akane-ga-saki.
Hue?
ガッ

Seems you're used to dodging!
But do you not plan on using the rumored gravity control and High Carrier?
...Unfortunately I can't really use them right now.
Is he not listening?

Eeh!? Why can't you use them!?
It's another part of the punishment from the previous incident.
Hmph... Are you just trying to buy my sympathy?
They say a lion hunts his prey with all his might...
Thus, I shall show no mercy!
ドガッ

Good work, Yuuto.
I leave them to you, Yayako-senpai
Oh my~
Thank you very much
I don't mind, but...
I'll be heading back then.
Hey... Kagamori ....!?
Is... is he okay...
No need to worry, Hana-san.

But, but, Kagimori said he couldn't use his powers...!?
And he doesn't have Acasia-chan or Yayako-senpai!

...Hana
If that thing's speed and power could do him in...
I would have eaten Yuuto already
Eh...?

...I was originally Yuuto's enemy... is all that means
!?
...Rather, his opponent is in danger.
I haven't seen Yuuto like that in a while
...He's probably angry that you were dragged into this...
eh...?

Kagimori is angry...?
You okay Yuunagi?
Of course.
In fact, I want you to run away because you're his target.
No way I could leave you by yourself.
Uh...
I'll say this right now.
However, there is no chance you'll win aginst my "Arahabaki Spacesu"
Hmph... I should praise you for not running away...!

I'M GOING TO DESTROY YOUR HIGH CARRIER.
Ha...
Hahaha! Have you gone mad?!
This is unlike any other Carrier!
For someone like you, who's only been on the defensive, to say you'll destroy... That's just hilarious!

If you're going to say run, I'll have to decline.
Yuunagi, leave the rest to me and-
Senpai, even though you're good at dodging, you can't block his attacks.
If it's my D-part, then I can block some of the damage for you...
The more you dodge, the more the disaster area spreads.
Besides, senpai is mistaken about something.

We need to show that idiotic Curator and his High Carrier who's in charge, TOGETHER.
Right now, senpai is MY assistant.
...You're right...Then I'll leave the defense to you, Yuunagi.
Good.
...Yuunagi, you sure have become a fine woman.
Ha...? Haaah!?
What's that supposed to mean!?

Hey...! Agh jeez...!
Let's go.
That means that your size is so-so, but you sure do have nice breasts.
If he wasn't quite like that...Ugh!!
Foolish- To challenge my Arahabaki in a frontal assault!
Fire-!!

Recursion.
Assyria's Lens!

Around B.C. 700, in the northern region of present day Iraq, there was an Assyrian City called Nimrud.

And in its ruins was the world's oldest crystalline lens.

It's believed to be a fragment of a crystal developed by the igneous bonding between wood and ivory and it's function as a lens was a coincidence—
Thats the leading theory anyway However-

It's true nature is a D-part able to bend space-time
An attack of that caliber can easily be bent and directed elsewhere.

-How is a Numbers as low as Ninth able to use such power!?
Therefore, if space itself is bent, then light bends with it!
Light... Is made up of small paticles.
PR note: Only if it's observed
However, this is far from the end!
Nooope. ..It's over.

EEH!? What's with that jumping power!!
Master has grown up resisting a weight six times that of Earth's gravitational pull, and therefore-
To Yuuto, earth's gravity is like 1/6 the norm...It's almost as if he's on the moon.
Th-...The "Sinner" Kagimori Yuuto...

I'll show you the reason
They call me "Sinner."
To destroy all the "King Tools" -
That is my... Purpose
Source of infection identified-

SURGEON!
...SCARLET KNIGHT

Gaaaaaaa!!!
Wha... My High Carrier was...In one hit!?
Scarlet Knight Surgeon

...That's the power of blood only Yuuto holds-
An anti-biotic which can destroy any D-parts in our world-
A power which can consume entire cultures ...
The karma of a "Sinner" ...
Ka... Kagimori ...?
Ow!

Eh....?

After being subjected to the Sinner's waves...
It seems the world's worst D-part's seal is beginning to come undone...

Now, Hana-chan,

Let us raise our long forgotten home of "Magallanica!"
